

# Isagro Copper Products

*Isagro is a global leader in copper technology with over 100 years experience*

## Badge<sup>®</sup> SC

Biosynergy<sup>®</sup>...  
The Best of Both Worlds

This patented highly stable liquid formulation of copper hydroxide and copper oxychloride provides quick and long lasting disease control using less metallic copper.

## Badge<sup>®</sup> X<sub>2</sub>

Perfect for conventional and organically grown crops

Same unique combination of copper hydroxide and copper oxychloride in an advanced dry formulation.

## Kentan<sup>®</sup> DF

Raising the value bar

"Bio-optimized" dry formulation of copper hydroxide provides outstanding disease control and unsurpassed value.

## Isagro Copper Products Deliver

- Purest copper available
- Optimized particle size for enhanced coverage and superior rainfastness
- Easy mixing, easy handling
- Excellent compatibility
- Proven performance
- Crop safety

“Badge coppers appear to be high quality products and perform as well as Kocide 2000 with no more risk of phytotoxicity.”

*L. W. Timmer, University of Florida*

“New copper products such as Badge SC and Badge X2, that can be applied at much lower metallic copper equivalents, provided similar disease control as compared to other formulations that require higher amounts of copper. Thus, these treatments are a step in reducing copper usage and making walnut blight management more environmentally friendly.”

*Jim Adaskaveg, UC Riverside*

## Particle size distribution affects performance. Smaller, uniform particles are superior.

- Optimized leaf coverage
- Better adherence to leaf surface
- Increase resistance to wash-off
- Greater stability in tank mixes
- Better disease control
